

## Competence in Microoptics

### *Optical components*

- Spherical lenses, plano parts, doublets and triplets
- All optical glasses and special materials (e.g.) fused silica, sapphire, silicon

### *Endoscope optics*

- Compact objectives, rod lenses, negatives, prisms and T-Windows
- Mounting of complete Innertubes, Image Transmitter and Eyepiece Assemblies

### *Customized opto-mechanical assemblies*

- Development according to customers requirements
- Prototypes and serial production
- Testing und documentation

### *Objectives for Image Processing / Machine Vision*
